

Fully Managed 24x7 Backup & Disaster Recovery

First-class protection for your valuable data

Our business continuity solution is about more than just backup – it's designed to quickly revive your network following any unplanned downtime and ensure your employees are operating productively in almost no time at all.

How It Works

Rather than simply relying on one method of backup, we add in extra levels of protection. As well as backing up to an on-site server, we also back up your data and network configuration information to the TMB Cloud. Should you suffer data loss for any reason (including mechanical failure, disk

corruption, natural disaster or cyber crime), we'll spin up your local backup and get you back to work in a matter of minutes. In the rare cases that doesn't work, we'll failover to the cloud backup.

What's more, TMB's technicians will be managing your backups right around the clock. If there are ever any problems with your backups, we'll automatically know, and we'll fix things there and then.

Unparalleled Peace of Mind

TMB's business continuity solution includes features like continuous data protection, cloud-based replication and recovery, and more – all for one low, fixed monthly price per protected server.

What does that mean? It means you can rest easy knowing that your critical data, emails, reports and other information are all protected, backed up and securely tucked away until you need them.

Additional Information

Contract terms: Customers may agree to a one-year or three-year contract term. As part of the three-year deal, they will be provided with a server, included in the price. Customers on a one-year contract will need to purchase their backup server separately.
